SM7

ALPINESTARS SM7® Helmet

DESCRIPTION

The S-M7 Helmet is engineered for off-road racing, and is optimized to offer the perfect blend of superior ventilation and comfort in a lightweight helmet, while its supremely aerodynamic composite shell delivers exceptional impact protection. As well as Alpinestars patented A-Head Fitment and Visor Detaching Systems, the S-M7 is equipped with innovative PLASMA technology at the lower side of the shell edge for optimum energy dissipation in case of contact with the collarbone area.

KEY FEATURES

Aerodynamic Design: The S-M7's aerodynamic profile design offers a smooth, streamlined shell free of any external channels and features that might act as a load point in an impact or compromise the overall integrity of the helmet's construction. **Energy-Deflecting Design:** The helmet's curved shell is engineered to reduce friction and deflect impact forces away from the head, helping protect the skull, neck, and spine in the event of a crash. **PLASMA Inside:** Alpinestars patented PLASMA technology is strategically-integrated into the S-M7's side pads for high performance shock absorption in a critical area, significantly reducing the risk of injuries. **A-Head Technology:** Alpinestars patented A-Head Fitment System allows easy adjustment of the angle and height that the helmet sits on the head for an optimized performance fit.

Patented Visor Release: The S-M7's patented Visor Release System is designed to detach during a crash, reducing the risk of helmet damage or rotational injury.

The S-M7's visor is engineered to automatically detach from the shell when it is subjected to an impact energy greater than 15 Joules for optimum impact protection, regardless of the direction. **Shell Sizing for Optimal Fit:** The S-M7 shell sizing solution ensures each helmet fit size delivers the most anatomical solution for the wide variety of fit needs worldwide, providing 3 different helmet shell sizes and 6 consumer sizes from XS to XXL to ensure riders have the correct fit which not only improves comfort and reduces overall weight, but most importantly, improves the effectiveness of the helmet in an impact. **Hydration System Ready:** The helmet incorporates integrated channels on both sides to accommodate a hydration system.

CONSTRUCTION

Multi-layer shell is constructed from a blend of fiberglass, carbon, and Aramid fiber for the optimum blend of impact protection and force dissipation, sliding performance, energy absorption, stability and durability. Patented A-Head Fitment System allows easy adjustment of the angle and height that the helmet sits on the head. Ultra-ventilated helmet with 20 individual intake and exhaust ports, not including the eye port, with 13 intakes and 7 exhausts, for optimum ventilation. Eject Removal System Ready: the helmet is designed to accommodate the installation of an eject removal system, which includes a removable insert on top of the EPS. Removable Lining: With a 3D foam for optimum comfort, the lining features an anti-microbial treatment for long-lasting freshness. The S-M7's fit can be further

customized via the Alpinestars genuine replacement cheek pads, which are available in all thicknesses, and are exchangeable between all shell sizes. Lightweight: ECE 1280g and DOT 1340g for a size medium. The S-M7 is available in 2 versions: ECE2206 and DOT homologation standards.

PROTECTION

The helmet's shell construction utilizes a highly advanced molding technology with a pre-preg composite construction that delivers enhanced mechanical performance with an ultra-light overall weight. The result of the unique shell lay-up process employed in the S-M7 construction results in extremely effective impact protection. The S-M7 returning linear and oblique impact performance significantly exceeds current helmet regulation standard limits. Specific rotational impact protection is provided by the combination of the internal shape and specific coating of the EPS liner, coupled to specially-developed surface in the comfort liner. This Alpinestars Patented Specific Coating technology reduces rotational acceleration transmitted to the rider's head: the S-M7 Helmet exceeds the new ECE 22.06 Peak Rotational Acceleration standard by 76%. Profiled chin bar for proven impact protection.

SM7

Outer Shell

The SM7's aerodynamic profile design offers a smooth, streamlined shell free of any external channels and features that might act as a load point in an impact or compromise the overall integrity of the helmet's construction.

The shell's curvature promotes reduced friction on impact, allowing deflection and the most efficient transfer of energy to protect the rider's head from direct force to the II and referred to the neck and spinal column.

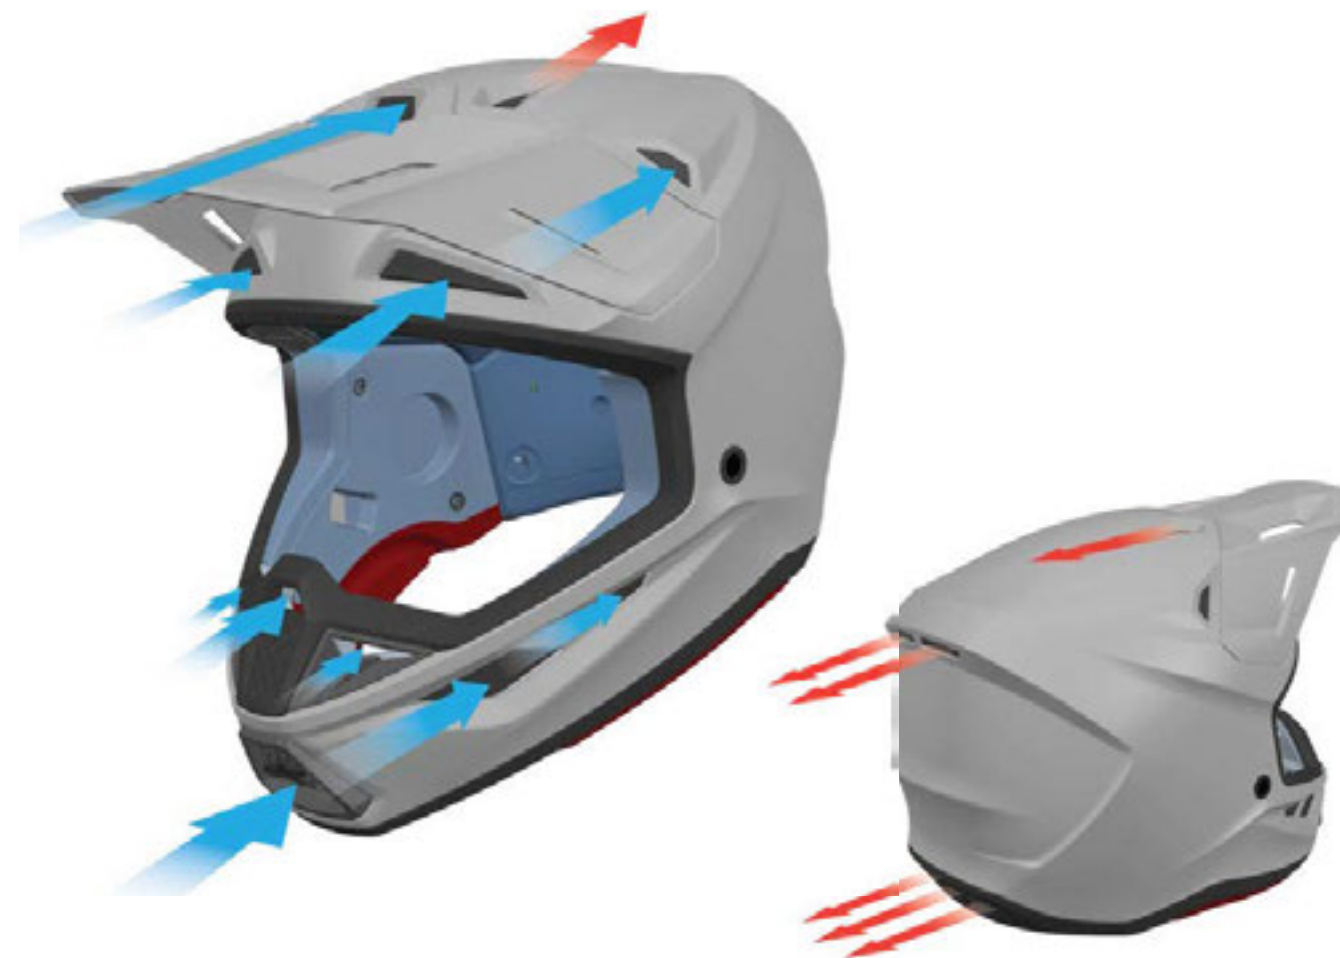

Patented System

The SM7's Visor Detaching System features a patented release mechanism is conceived to avoid the inherent weaknesses in other anchoring systems. The SM7's visor is engineered to automatically detach from the shell when it is subjected to an impact energy greater than 15 Joules for optimum impact protection, regardless of the direction.

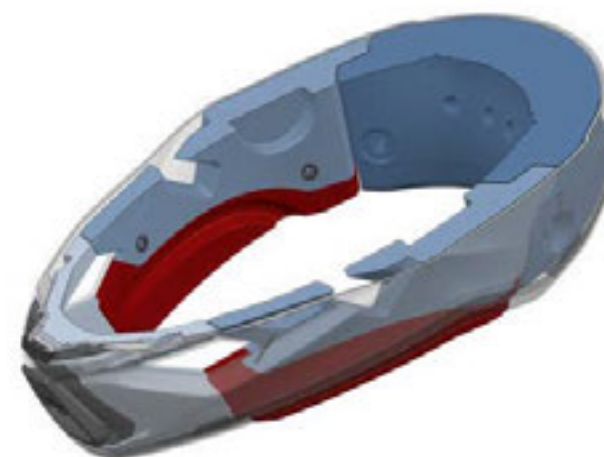

Ventilation

Ultra-ventilated helmet with 20 individual intake and exhaust ports, not including the eye port, with 13 intakes and 7 exhausts, for optimum ventilation.

Collarbone Protection

PLASMA inside; Alpinestars patented PLASMA technology is strategically-integrated into the SM7's side pads for high performance shock absorption in a critical area, significantly reducing the risk of injuries.

NUCLEON
PLASMA

Removable Lining

Linings are removable and washable by hand using warm water (max 30° Celsius) and neutral soap.

Fabrics have antimicrobial treatments.

Crown Pad: the Crown Pad and the Neck Pad are elastically connected, for better oblique impact management.

Top Pad: the Top Pad is removable and adjustable in height thanks to the A-head system.

Cheek Pads: the Cheek Pads are fitted 3D foam, with an emergency extraction system (ERS), with a channel for hydration tube installation. Cheek pads are interchangeable among all sizes.

Chinstrap: chin strap is fitted with a 25 mm width nylon strap, stainless steel DD rings, removable covers for washing purpose.

The SM7 helmet fit can be customized to the User's needs with Alpinestars genuine parts: cheek pads are available in different thicknesses for a truly optimized fit (all thicknesses are exchangeable among all sizes)

Fit Customization

The SM7 shell sizing solution ensures each helmet fit size has its own appropriate shell size to deliver the most anatomical solution for the wide variety of fit needs worldwide, providing three different helmet shell sizes M, L, and XL, and 6 consumer sizes from XS to XXL to ensure riders have the correct fit which not only improves comfort and reduces overall weight, but most importantly, improves the effectiveness of the helmet in an impact.

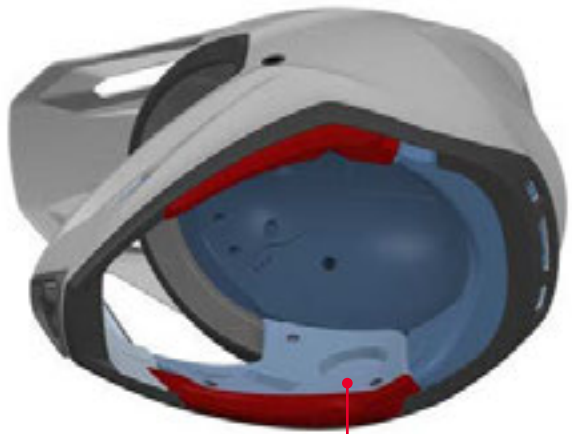

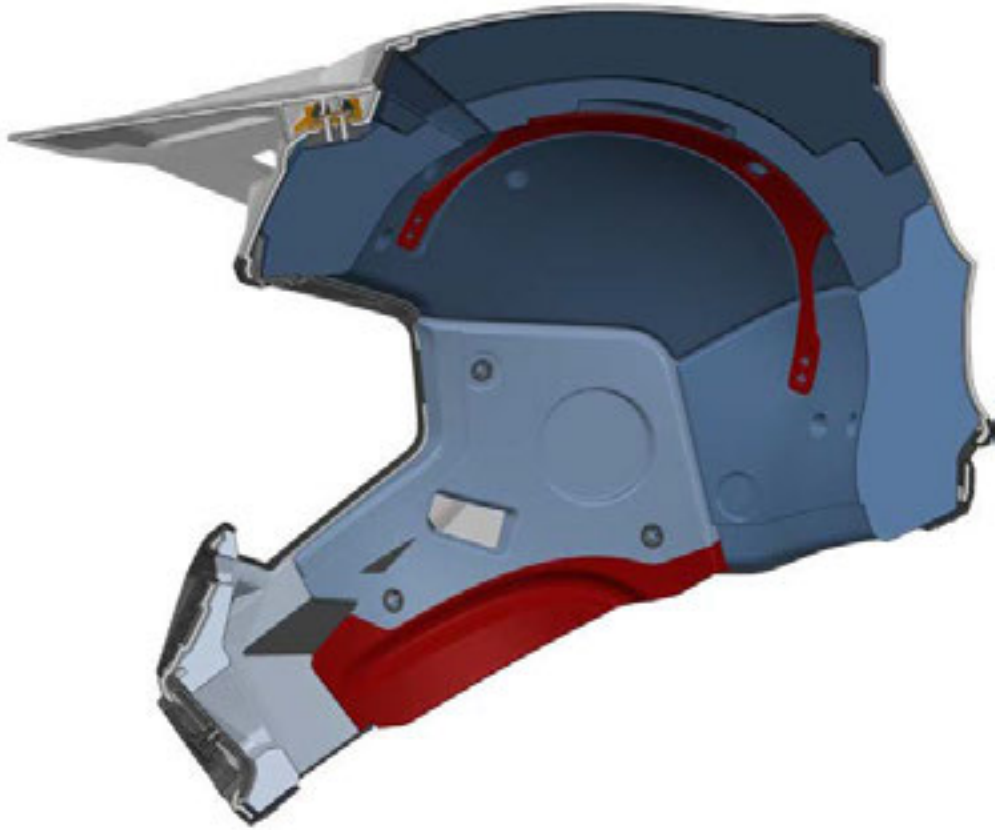

The SM7's fit can be further customized via the Alpinestars genuine replacement cheek pads, which are available in all thicknesses, and are exchangeable between all shell sizes.

Hydration System

Integrated channels on both sides to accommodate a hydration system.

SM7

Communication

Communication System Compatible: cutaway section on the left-side of the EPS to seamlessly accommodate Intercom Systems, with earphone recesses on both sides for speakers.

SM3

ALPINESTARS SM3® Helmet

DESCRIPTION

Engineered for MX, Enduro, and off-road riding, the SM3 Helmet integrates advanced technologies and innovations designed to enhance ease of use, comfort, and impact protection.

KEY FEATURES

Advanced Shell Construction: This helmet features a thermo-injected shell incorporating a special polymer blend enhanced by varying degrees of thickness that is engineered to deliver the optimal combination of impact protection and lightweight. The SM3 medium size helmet weighs 1310g (ECE) and 1430g (DOT).
Ventilation: Maximized ventilation and high levels of heat transfer exchange thanks to 10 inlets and seven exhaust ports.

Rotational Acceleration Force Protection: Alpinestars patented low-friction coating is applied to the inner part of the main EPS liner to reduce the rotational acceleration forces that can result from certain oblique impacts.

This layer essentially acts as a slip plane to mimic the brain's own low-friction cerebrospinal fluid, which is the body's natural defense against oblique impacts.
Visor Release: Patented visor release system ensures the visor is released with the correct pre-determined amount of force, effectively reducing the forces on the rider's neck during an impact.

CONSTRUCTION

The inner and outer surfaces are engineered to minimize the effects of oblique impacts. 6 EPS/EPP inner parts with 5 densities to effectively manage volume and impact performance. Hydration tube channels are integrated into the helmet's cheek pads for convenience and performance. Comfort liner is constructed using recycled materials for a lower carbon footprint. The fit can be tailored to the rider's head thanks to the helmet's crown and cheek pads, which are available as genuine spare parts in different thicknesses.

PROTECTION

Alpinestars has introduced a new in-house standard for the SM3 helmet to test the helmet's chin to conditions heavier than the homologation standard, and in order to pass the Alpinestars' new standards, the shell thickness and the structure of the helmet design itself have both been optimized on the chin area for superior impact performance. The inner and outer surfaces are engineered to minimize the effects of oblique impacts. Equipped with an Emergency Release System and removable cheek pads to permit the safe and easy removal of the cheek pads while the helmet is still on, while the 3D contoured foam ensures rider comfort.

Soft textile chin strap is 25mm for optimal safety and rider comfort.

Stainless steel D-rings ensure a tight and secure fit. The SM3 Helmet conforms to both DOT certification and ECE 2206 homologation for use worldwide.

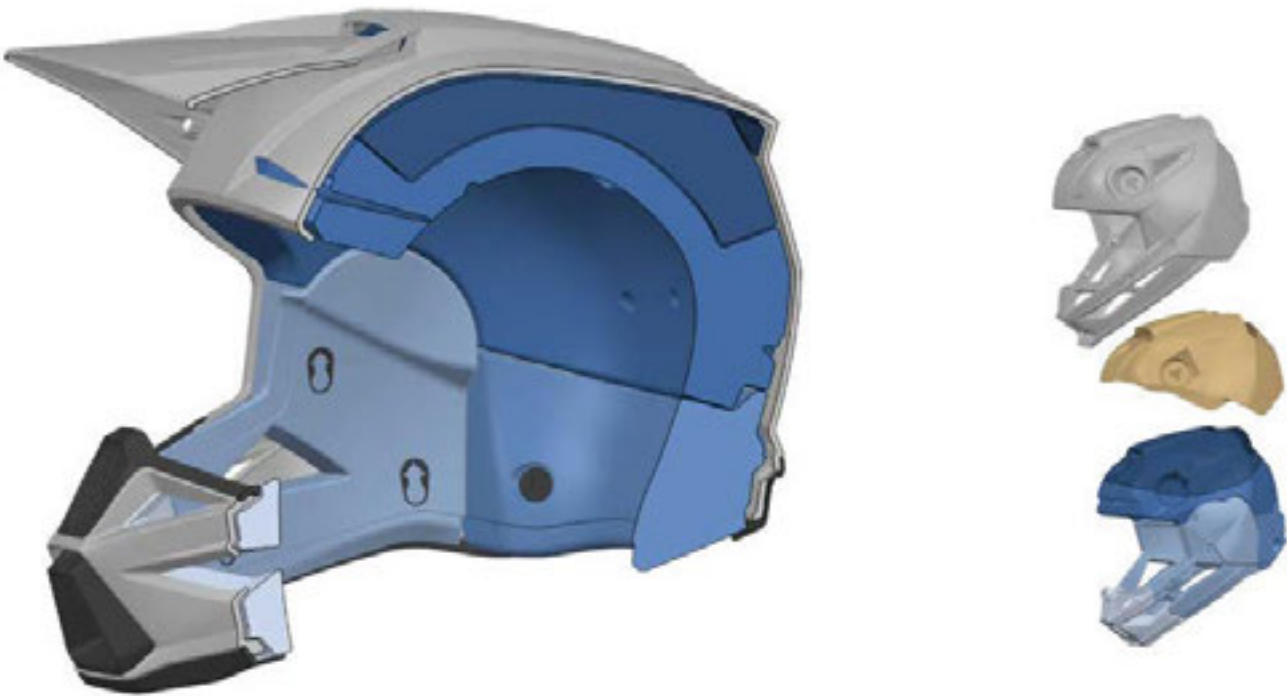

Dot Inner Shell

The S-M3 helmet conforms to both DOT certification and ECE 2206 homologation for use worldwide.

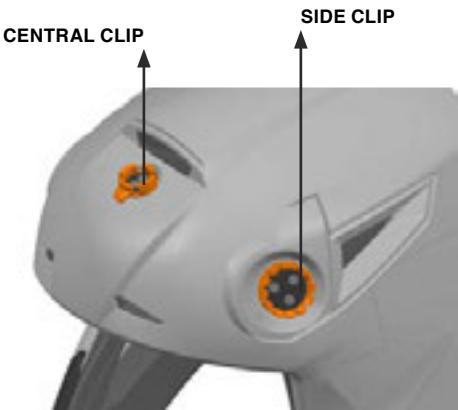

Ventilation

Maximized ventilation and high levels of heat transfer exchange thanks to 10 inlets and 7 exhaust ports.

Visor Detaching System
PATENTED SYSTEM

Patented visor release system ensures the visor is released with the correct pre-determined amount of force, effectively reducing the forces on the rider's neck during an impact.

Innovative Friction Coating

Alpinestars patented low friction coating is applied to the inner part of the main EPS liner to reduce the rotational acceleration forces that can result from certain oblique impacts. This layer essentially acts as a slip plane to mimic the brain's own low friction cerebrospinal fluid, which is the body's natural defense against oblique impacts.

Lightweight Outershell

This lightweight helmet features a thermo-injected shell incorporating a special polymer blend enhanced by varying degrees of thickness that is engineered to deliver the optimal combination of impact protection and light weight.

GEAR

AFD
**SUPER
TECH**

SIZE JERSEY S -2XL PANTS 28 - 38

ABOUT The Supertech AFD Jersey is engineered for elite-level motocross riders seeking exceptional dirt riding performance. At its core, Alpinestars' innovative AFD (Alpinestars Force Deflector) shoulder technology helps minimize shoulder injury risk by deflecting impact forces and reducing rotational acceleration during crashes or contact with the ground. Developed in Alpinestars' state-of-the-art R&D facility, the jersey's multi-layer, low-friction shoulder design helps redirect energy away from the shoulder, enhancing rider safety. Incorporating advanced SX and MXGP race-derived technologies, this jersey offers premium durability, unrestricted movement, and superior ventilation - making it the ultimate choice for championship-level performance.

JERSEY

JERSEY KEY FEATURES

Innovative Supertech AFD Shoulder Construction: Race-proven, multi-layer, low-friction design reduces impact force and rotational stress to the shoulder, minimizing the risk of injuries. Seamlessly integrated into the jersey's construction, AFD enables sliding and rotational movement to deflect force, reducing oblique and rotational stress on the shoulder during crashes or contact with the ground.

Athletic Pro Racing Fit: Ultra-light, ergonomic cut for maximum mobility on the track.

Professional Racing Performance: Designed for competitive riding, delivering top-level flexibility, comfort, and fit.

JERSEY CONSTRUCTION

Lightweight, multi-layer Supertech AFD shoulders for optimal energy deflection.

Advanced stretch mesh construction with localized perforations for ultralightweight, breathability, and maximum ventilation.

Extensive, strategically positioned laser-cut perforations throughout the upper and lower arms, sides, and armpit areas for additional airflow and ventilation.

Innovative Stretchnet construction incorporates fully elastic material on the back, ensuring superior flexibility and airflow.

Seamless design (eliminating side, elbow, and underarm seams) for enhanced rider comfort.

Extended rear for greater coverage and compatibility with Alpinestars MX pants. -Flat stretch construction on the arms with slight curvature at the shoulders for enhanced range of motion.

JERSEY PROTECTION

Alpinestars' innovative AFD technology helps minimize force transmission to the shoulders, reducing the risk of injury.

PANTS

PANTS KEY FEATURES

Advanced Construction: Built from a single-layer, advanced stretch ripstop fabric designed for durability. Alpinestars specifically developed this textile fiber composition for optimal strength, elasticity, and abrasion resistance.

Professional Racing Performance: Single-layer construction for enhanced rider comfort, and lightweight, designed to easily accommodate knee braces making the pants ideal for competitive riding.

Athletic Pro Racing Fit: Premium athletic fit and optimized patterning provide the flexibility, comfort, and freedom of movement essential for professional riders.

PANTS CONSTRUCTION

Durable, full 4-way stretch construction provides high levels of ventilation and lightweight comfort (80% durable 270g/m² stretch ripstop material for longlasting wear).

Pants feature a range of SX and MXGP race-proven technologies.

Goat leather with stretch aramid fiber contoured inner knee panels for enhanced feel and durability.

Stretchnet zones along the lower legs deliver an ultra-lightweight construction with superior airflow and stretch.

Linerless design for superior comfort and easy use with knee braces or knee guards.

Strategically placed perforations boost ventilation and airflow. -SX1 auto-lock magnetic buckle for fast, secure closure.

The silicone inner waistline keeps pants securely in place.

Covered, zippered fly for durability.

SUPER
TECH

SUPERTECH

SIZE JERSEY S - 2XL PANTS 28 - 38

ABOUT Supertech is Alpinestars innovative Pro Level Motocross apparel line, designed for superior dirt riding performance. Supertech gear offers a full Factory Rider design, featuring a variety of SX and MXGP race-proven technologies that deliver premium levels of flexibility, freedom of movement, ventilation, durability, and rider comfort.

JERSEY

JERSEY KEY FEATURES

Pro Level Jersey Design: Featuring an extremely lightweight, premium athletic cut and fit, the Supertech Jersey with its engineered ergonomic cuts provides enhanced body movement on the track.

Athletic Pro Level Racing Fit: Premium athletic performance race fit designed for aggressive riding and professional levels of movement, flexibility, and comfort.

New Design and Fresh Style: The jersey features a curvier, elongated collar for a distinctive look, along with a two-piece cuff with contrasting color taping for unique color blocking.

JERSEY CONSTRUCTION

Engineered design for an athletic race fit, a chassis consisting entirely of advanced stretch mesh, and an ultra-lightweight construction result in the Supertech Jersey being Alpinestars lightest-ever MX jersey.

Extensive, strategically positioned laser-cut perforations throughout the upper and lower arms, sides, and armpit areas provide additional airflow and ventilation.

Innovative Stretchnet construction incorporates fully elastic material on the full chest and back, providing extensive stretch for freedom of movement and excellent stretch retention while offering top-level performance, and ventilation for exceptional rider comfort.

Innovative Seamless Construction eliminates side, elbow, and underarm seams to maximize rider comfort.

Seamless bonded collar and cuffs for enhanced rider comfort.

Extended rear for greater coverage in the riding position and compatibility with Alpinestars' MX pants.

Flat stretch construction on arms and shoulders for enhanced range of movement and rider comfort.

New cuff hem finishing.

PANTS

PANTS KEY FEATURES

Advanced Stretch Construction: The Supertech Pants are constructed from a single-layer, advanced stretch rip-stop fabric. Alpinestars has specifically developed the textile fiber composition for optimized mechanical properties including strength, elasticity, and abrasion durability.

Designed for Performance: Featuring a performance-engineered single-layer construction for enhanced wearability, superior comfort, lighter weight, and ease of use with knee braces.

Pro Rider Athletic Fit: Premium athletic fit and performance shape with an updated pattern designed to provide the high levels of enhanced body movement, flexibility, and comfort required by professional riders.

PANTS CONSTRUCTION

Durable, full 4-way stretch construction, offering high levels of ventilation, and lightweight.

The Supertech Pants feature a host of SX and MXGP race-proven technologies. -Goat leather with stretch aramid fiber contoured inner knee panel for optimal feel and durability.

Highly breathable Stretchnet zones along the entire lower leg provide ultralightweight construction, delivering superior airflow and excellent stretch retention for high levels of comfort and performance.

Linerless design for optimized rider comfort and effortless on and off with knee braces or knee guards. -Strategically positioned perforations for additional airflow and optimum

ventilation. -SX1 auto-locking magnetic buckle for a quick and secure closure.

-Covered, zippered fly for durability.

Silicone inner waistline to keep the pants in position.

TECH/STAR

SIZE JERSEY S - 2XL PANTS 28 - 38

ABOUT The Techstar line offers the optimal blend between performance and durability. Engineered for advanced-level competition on all terrain and offering a racing-derived fit and cut, the jersey's multimaterial construction delivers the highest levels of ventilation and stretch for excellent freedom of movement.

JERSEY

JERSEY KEY FEATURES

Athletic Race Fit and Ergonomic Design: The lightweight, Techstar Jersey with its athletic race fit features an updated multi-material construction with a precisely body-mapped polyfabric stretch main chassis that incorporates ergonomic stretch inserts for premium mobility and enhanced rider comfort.

Optimal Ventilation: Strategically positioned laser perforations for additional airflow and optimum ventilation.

JERSEY CONSTRUCTION

The Techstar Jersey is constructed from a lightweight, highly durable, stretch fabric, with a moisture-wicking treatment for superior comfort and performance.

Ergonomically engineered cut and optimized racing multi-panel pattern for enhanced freedom of movement and superior mobility. -The jersey incorporates laser-cut perforations on the chest and arms for added ventilation.

Strategically positioned stretch inserts for superior freedom of movement.

Flat stretch construction on arms and shoulders for enhanced range of movement and rider comfort.

Innovative construction utilizes no side seams and no underarm seams for maximum rider comfort.

Seamless bonded collar for ease of use and enhanced rider comfort and seamless bonded cuffs.

Extended rear for greater coverage in the riding position and compatibility with Alpinestars' MX pants.

PANTS

PANTS KEY FEATURES

Durable Stretch Construction: The Techstar Pants have a reinforced materials construction featuring durable 600 D polyfabric and stretch ripstop materials.

Ergonomic Cut Designed for Performance: Featuring an ergonomically engineered racing cut with an optimized multipanel pattern delivering a second skin feel and providing premium freedom of movement and superior mobility.

Reinforced Butt Patch for Enhanced Durability: Engineered with a high-strength 600D polyfabric, the Techstar Pants offer superior durability and abrasion resistance in high-wear areas, ensuring long-lasting protection and comfort during intense racing conditions.

PANTS CONSTRUCTION

The Techstar Pants are constructed from a durable 600D coated polyfabric and an all-new advanced blend of stretch ripstop fabric offering enhanced stretchability and durability, with durable 4-way stretch on the yoke, thighs, and upper knees. Engineered to provide exceptional flexibility, enhanced comfort and unrestricted movement and allowing riders to maintain peak performance during intense riding sessions.

The performance-engineered single-layer construction and linerless design offer enhanced wearability, superior comfort, and lighter weight, providing an effortless on and off, even when worn with knee braces or knee guards.

Reinforced, non-stretch materials have been used on the seat, crotch, and knees for enhanced durability.

Innovative Babel knee gusset construction for optimal flexibility, added ventilation, and maximum rider comfort.

Secure and quick SX2 auto-locking magnetic buckle for optimum waist closure.

Strategically positioned laser perforations for additional airflow and optimum ventilation.

Goat leather inner knees for premium feel and durability.

Elasticated waist with silicone inner waistline keeps the pants securely in position.

Covered zippered fly for durability.

Expanded size range includes additional sizes 42 and 44.

Perfect compatibility with Alpinestars' MX jerseys.

SIZE JERSEY S - 2XL PANTS 28 - 44

ABOUT Developed and tested on some of the toughest terrains around the globe, the Racer gear is ideal for many forms of off-road riding thanks to the ergonomic pre-curved pattern construction and its moisture-wicking, lightweight, and durable technical materials. Designed to offer optimal levels of comfort and durability needed by racers and everyday riders, the Racer Jersey and Pants come in a range of distinctive and aggressive color combinations created to match the Racer Gear and Alpinestars' MX Gloves line for a total performance look and feel.

JERSEY

JERSEY KEY FEATURES

Durable, Advanced Construction: Featuring an extremely lightweight and durable main construction, the Racer Jersey has an advanced, multi-material, polyfabric construction that is lightweight, moisture-wicking, and ventilated.

Race Fit: Featuring a race fit with an ergonomic, multi-panel design that elevates overall fit and style.

New Mesh Panels on Torso Sides: Premium stretch mesh for improved stretchability and lightweight breathability.

JERSEY CONSTRUCTION

- Featuring a more relaxed, pre-curved construction, the Racer Jersey has an ergonomically engineered sport fit and pattern designed to offer superior mobility and enhanced body movement.
- Strategically positioned breathable stretch mesh inserts on the undersides of the arms for enhanced breathability, fit, and superior freedom of movement.
- Stretch collar neck construction features a more open and optimum relaxed fit for enhanced comfort.
- Cut longer in the rear for greater coverage when
- Fitted wrist cuffs for an optimized fit.

PANTS

PANTS KEY FEATURES

Race Fit: Designed with a sport cut, extensive stretch panels, and a pre-curved leg construction, the Racer Pants ensure agility and comfort, especially in the riding position.

Durable, Advanced Construction: Made from lightweight yet durable 600D polyfabric, the Racer Pants are reinforced in high-wear areas like the seat and knees for enhanced durability.

Enhanced Mobility: Featuring stretch ripstop fabric inserts in the back yoke, crotch area, and above the knees—drawing on materials from the Supertech line— the Racer Pants deliver premium freedom of movement and rider comfort.

PANTS CONSTRUCTION

- Featuring an ultra-lightweight, stretchable, and durable construction, the Racer Pants provide superior airflow thanks to the highly breathable and vented, Stretchnet panels located on full back of the lower legs specifically designed to maximize ventilation, comfort, and stretchability.
- The updated ergonomic construction includes a sport cut for an enhanced performance fit.
- Goat leather inner knees provide a premium feel, enhanced grip, and added heat and abrasion resistance.

ABOUT Developed and tested on some of the toughest terrains around the globe, the Racer gear is ideal for many forms of off-road riding thanks to the ergonomic pre-curved pattern construction, and its moisture-wicking, lightweight, and durable technical materials. Designed to offer optimal levels of comfort and durability needed by racers and everyday riders, the Racer Graphite Jersey and Pants come in a range of distinctive and aggressive color combinations created to match the Racer Gear and Radar Gloves' line for a total performance look and feel.

JERSEY

JERSEY KEY FEATURES Featuring an extremely lightweight and durable main chassis, the race fit, Racer Graphite Jersey has an advanced, multimaterial, poly fabric construction that is lightweight, moisturewicking and incorporates breathable stretch mesh inserts for enhanced airflow.

JERSEY CONSTRUCTION Featuring a more relaxed, pre-curved construction, the Racer Graphite Jersey has an ergonomically engineered sport fit and pattern designed to offer superior mobility and enhanced body movement.

Strategically positioned breathable stretch mesh inserts on under sides of the arms for enhanced breathability, fit, and superior freedom of movement.

Overlock stitching throughout for additional durability.

Stretch collar neck construction featuring a more open and optimum relaxed fit as well as enhanced comfort.

Cut longer in the rear for greater coverage when riding.

Fitted wrist cuffs for an optimized fit.

PANTS

PANTS KEY FEATURES The sport cut, Racer Graphite Pants offer optimized levels of comfort and performance in the riding position, thanks to their lightweight chassis, extensive stretch panels, and pre-curved leg design.

The Racer Graphite Pants are constructed from an advanced blend of stretch ripstop fabric inserts on the back yoke, in the crotch area and above the knees from the Supertech line for enhanced stretchability, and new 2025 reinforced 600D polyfabric for even greater durability on the seat and knees.

PANTS CONSTRUCTION The main material in the Racer Graphite Pants is engineered to be ultra-lightweight, stretchable, and durable, while also delivering superior airflow thanks to the highly breathable and vented, Stretchnet panels located on the full back of the lower legs designed to deliver ventilation, comfort, and stretchability.

New ergonomic construction with sport cut for an enhanced performance fit.

Goat leather inner knees for premium feel with the bike and enhanced grip, comfort, as well as heat and abrasion resistance.

Secure and quick SX2 auto-lock, magnetic buckle and waist adjustment for a customized waist closure, derived from the Techstar line.

Silicone inner waistline to keep the pants in position.

Zippered fly for ease of use.

AIR

SIZE JERSEY S - 2XL PANTS 28 - 40

ABOUT Developed and tested on some of the toughest terrains around the globe, the Racer Air gear is ideal for off-road riding on warmer days, thanks to the gear's full airflow construction, ergonomic pre-curved pattern, and its moisture-wicking, lightweight, and durable technical materials. Designed to offer optimal levels of airflow, comfort, and durability needed by racers and everyday riders, the Racer Air Jersey and Pants come in a range of distinctive and aggressive color combinations created to match the Racer Air Gear and Alpinestars' MX Gloves line for a total performance look and feel.

JERSEY

JERSEY KEY FEATURES

Premium Airflow: Full mesh construction with extensive perforations, the all-airflow, Racer Air Jersey delivers outstanding levels of ventilation and rider comfort.

Durable, Advanced Mesh Construction: Featuring an extremely lightweight and durable mesh main construction, the Racer Air Jersey has an advanced, multi-material, polyfabric construction that is lightweight, moisturewicking, and ventilated.

Ergonomic Race Fit: Featuring a race fit designed with precision cuts that enhance body movement, fit, and style—perfect for motocross racing.

JERSEY CONSTRUCTION

High-performing, full airflow mesh construction delivers enhanced ventilation and rider comfort.

Featuring a relaxed, pre-curved construction, the Racer Air Jersey has an ergonomically engineered race fit and pattern designed to offer superior mobility and enhanced body movement.

Cut longer in the rear for greater coverage when riding.

Stretch collar neck construction features a more open and optimum relaxed fit as well as enhanced comfort.

Fitted wrist cuffs for an optimized fit.

Overlock stitching throughout for additional durability.

PANTS

PANTS KEY FEATURES

Enhanced Premium Airflow: Extensive perforations on the hips, thighs, and lower legs, along with breathable Stretchnet panels running down the back of the lower legs, provide exceptional ventilation and cooling airflow for optimal comfort in warm weather and during intense rides.

Durable Construction: Built from lightweight, durable 600D polyfabric with perforations for airflow, the Racer Air Riway Pants are reinforced in high-wear areas, such as the seat and knees, to enhance durability and ventilation.

Race Fit: Designed with a sport cut, extensive stretch panels, and pre-curved leg construction, the Racer Air Riway Pants ensure agility and comfort, especially in the riding position.

Enhanced Mobility: Featuring stretch ripstop fabric inserts in the back yoke, crotch area, and above the knees—drawing on materials from the Supertech line—the Racer Air Riway Pants deliver premium freedom of movement and rider comfort.

PANTS CONSTRUCTION

Featuring an ultra-lightweight, stretchable, and durable design, the Racer Air Riway Pants ensure exceptional airflow, thanks to extensive perforations on the hips, thighs, and lower legs. -

he highly breathable Stretchnet panels on the back of the lower legs further enhance ventilation, comfort, and flexibility, maximizing cooling and overall range of motion for MX riders.

Goat leather inner knees provide a premium feel, enhanced grip, as well as added heat and abrasion resistance.

The updated ergonomic design features a sport-cut that enhances performance fit, providing greater comfort and mobility for the rider.

Unique ergonomic construction tailored to each graphic. The materials are dyed rather than sublimated, enhancing color vibrancy and providing greater fade resistance over time.

The silicone inner waistline keeps the pants securely in place.

Zippered fly for convenience and ease of use.

A secure and quick SX2 auto-lock magnetic buckle and adjustable waist closure derived from the Techstar line ensure riders a customized fit.

Mesh liner included.

YOUTH SUPERTECH SWAN

YOUTH & KIDS MOTOCROSS / OFF-ROAD

SIZE:

JERSEY: S - XL PANTS: 22 - 28

ABOUT:

Supertech is Alpinestars' innovative pro-level motocross apparel line, engineered for exceptional dirt riding performance. The Youth Supertech gear incorporates race-proven technology to deliver optimal stretch, flexibility, freedom of movement, ventilation, durability, and comfort. Tailored for competitive young riders aged 5 to 15, the Youth Supertech Jersey offers an athletic race fit, ideal for top-level performance.

JERSEY KEY FEATURES

Pro-Level Jersey Design: The Youth Supertech Jersey features a lightweight, premium athletic cut, with ergonomically engineered cuts that enhance freedom of movement on the track.

Performance-Engineered Racing Fit: Designed for intense riding sessions, delivering premium levels of movement, flexibility, and comfort.

JERSEY CONSTRUCTION

The jersey is crafted entirely of advanced stretch mesh that offers an ultra-lightweight construction.

Extensive, strategically positioned laser-cut perforations throughout the upper and lower arms, sides, and armpit area provide additional airflow and ventilation.

Seamless bonded collar and cuffs for enhanced rider comfort.

Extended rear for greater coverage in the riding position and compatibility with Alpinestars' MX pants.

Flat stretch construction on arms and shoulders for enhanced range of movement and rider comfort.

PANTS KEY FEATURES

Advanced Materials: The Youth Supertech Pants are constructed from a single-layer, advanced stretch rip-stop fabric mixed with high durability, 600D multi-panel polyfabric featuring optimized mechanical properties including strength, elasticity, and abrasion durability.

Enhanced Fit and Revised Pattern: Premium athletic fit and performance shape with an updated pattern designed to provide the high levels of enhanced body movement, flexibility, and comfort required by competitive riders.

PANTS CONSTRUCTION

Durable, full 4-way stretch construction offers high levels of ventilation and is lightweight for optimal rider comfort and long-lasting wear.

Reinforced 600D seat area for added durability in a highwear zone.

Suede microfiber laredo inner knee panels for optimal feel and durability.

Highly breathable Stretchnet zones on the full lower leg provide ultra-light weight, while also delivering superior airflow and stretchability.

Inner mesh lining at the rear and back thighs for greater structural integrity and longer wear.

Strategically positioned perforations for additional airflow and optimum ventilation.

Ratchet closure offers a quick and secure closure.

Elasticated waist to keep the pants in position.

Covered, zippered fly for durability.

Expanded size range includes additional size 30.

MEGAWATT V2 AIR GLOVES

MOTOCROSS / OFF-ROAD

NEW
ITEM

CODE 3560327
SIZE S - 3XL

ABOUT Engineered specifically to handle the rigors of Enduro riding and featuring a design optimized for the perfect blend of performance and protection, the Megawatt v2 Air Glove is equipped with Alpinestars Dynamic Friction Shield (DFS) knuckle guard for effective protection against repeated impacts delivering CE Level 1-rated impact protection. Constructed with high tensile 3D mesh for maximum airflow and incorporating strategic reinforcements, the Megawatt v2 Air Glove offers excellent comfort and performance features.

KEY FEATURES Extreme Enduro Performance: Designed for the toughest Enduro riding conditions, the Megawatt v2 Air Gloves deliver advanced protection with Dynamic Friction Shield (DFS) knuckle guards and leather reinforcements. The high-tensile 3D mesh construction with stretch inserts enhances comfort and mobility.

Ergonomic Shape for Enhanced Comfort: The Megawatt v2 Air Gloves offer a precise, ergonomic fit that delivers all-day comfort on the handlebars during long rides.

Enhanced Movement: Stretch inserts at the finger walls increase flexibility and ventilation, where riders need it most.

High Durability: Built to endure, the Megawatt v2 Air Gloves feature strategic reinforcements at the fingertips, side hands, palm landing zone, and thumb area.

CONSTRUCTION Ergonomic palm for optimal comfort on the handlebar/grips for long riding sessions.
Alpinestars Dynamic Friction Shield (DFS) knuckle guard for effective protection against impacts.
High tensile 3D mesh and genuine leather top hand for enhanced durability, abrasion resistance and breathability.
Ergonomic synthetic suede palm for high levels of durability and grip.
Stretch insert on fingers offers an improved range of hand movement and greater sensitivity while operating the bike controls.
Silicone print on index fingers for optimized grip.
Neoprene cuff for an optimized fit and a secure closure.
Conductive palm construction for use with smartphones.

PROTECTION Alpinestars Dynamic Friction Shield (DFS) knuckle guard for effective protection against repeated impacts.
TPU slider for superior abrasion resistance
According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply:
Fully CE-certified riding garment to CE Level 1 KP.

FULL BORE V2 GLOVES

MOTOCROSS / OFF-ROAD

CODE 3560426

SIZE S - 4XL

ABOUT The Full Bore v2 Gloves offer a powerful balance of performance, protection, and airflow, designed with motocross riders in mind. Built from advanced, reinforced, breathable, stretch fabric, and a newly engineered ergonomic TPR knuckle, these gloves ensure an exceptional fit and high levels of rider comfort, ideal for those seeking a durable and protective glove for intense MX riding sessions.

KEY FEATURES Reliable Protection and Comfort: The gloves' newly designed TPR knuckle protectors deliver both effective protection and comfortable flexibility for demanding rides.
Proven durability: Reinforced synthetic suede palm enhances durability and allows easy use of mobile devices without removing the gloves.
Breathable Flex Construction: The gloves' breathable flex fabric upper construction and the ventilated stretch fourchettes deliver premium comfort and mobility on the bike's controls.

CONSTRUCTION

- Upper is constructed from a breathable stretch fabric that provides high levels of rider comfort and an optimized fit.
- Ventilated stretch fourchettes for enhanced levels of comfort and flexibility.
- The neoprene cuff, with its integrated wrist strap, offers a secure and personalized fit while maximizing comfort and flexibility.
- Backhand is reinforced with an advanced TPR knuckle protector specifically designed to allow each part of the protector to move with the hand, maintaining mobility and comfort during high-intensity movements typical of motocross and off-road riding.
- Reinforced synthetic suede palm for high levels of durability and a secure grip on the handlebars and bike's levers.
- Perforated, reinforced thumb patches for added durability, abrasion resistance, and airflow.
- Silicone print on the first and second fingers for optimized grip with the bike's controls.
- Pull tab with a silicone grip for easy on-off.

YOUTH RADAR GLOVES

MOTOCROSS / OFF-ROAD

CODE 3541824

SIZE 3XS-L

ABOUT Lightweight and designed with excellent comfort features, the Youth & Kids Radar Gloves incorporate a single-layer construction all around, with a single-layer stretch backhand and synthetic suede palm for high levels of comfort and improved feeling with the bike's controls. Starting from the MX25 line, the Youth & Kids Radar Gloves have conductive material for the palm and fingers, and a convenient seamless closure strap.

KEY FEATURES

- Enhanced Fit and Feel: Performance construction with a single-layer palm and stretchable single-layer backhand provides a secure, natural fit and improved handlebar control.
- Increased Durability: Rolling palm and rolling fingertips on two external fingers for enhanced durability.
- Optimal Breathability: Thumb patch perforations ensure enhanced airflow.
- Long-Lasting Comfort: A synthetic suede palm provides both durability and a comfortable feel.

CONSTRUCTION

- Performance construction with a single-layer palm with a stretchable single layer backhand for optimized fit and feel.
- Synthetic suede palm for high levels of durability.
- Conductive palm and fingers for use with smartphones and touchscreen devices.
- Perforated thumb patch reinforcement for enhanced durability.
- Localized perforations on the thumb patch for performance.
- Pull tab for quick and easy entry into the glove.
- Seamless closure strap for security.
- Stretch fourchettes between all fingers for increased flexibility.
- Sublimated graphic on backhand.

PROTECTION

BIONIC RACE PROTECTION TOP

MOTOCROSS / OFF-ROAD

CODE 6500227
SIZE 2XS - 2XL

ABOUT The Bionic Race Protection Top is engineered for riders who demand both safety and freedom of movement. Designed to be worn under a chest protector and TechAir® MX, it adds CE-certified shoulder and elbow protection through all-new, removable A-Morph Technology protectors. These ultra-low-profile protectors deliver outstanding flexibility and energy absorption without compromising comfort. Ultra-lightweight and highly ventilated, the stretch mesh chassis adapts seamlessly to body movement, ensuring stable, breathable protection across all riding conditions.

KEY FEATURES All protectors in this garment feature A-Morph Technology, a morphing structural system that dynamically adapts to the rider's body, providing superior impact absorption, multi-impact resilience, lightweight flexibility, and enhanced comfort with integrated breathability and thermal regulation. The main chassis is constructed from a soft tactile highly breathable stretch mesh fabric for optimized cooling performance. Features CE Level 1 Certified A-Morph Technology Shoulder and Elbow Protectors.

BLACK 10

CONSTRUCTION Stretchable bottom hem to ensure the top always remains securely in position. Comprehensive arm openings for superior freedom of movement and ventilation. Short-cut, sports-fit for reduced material bulk and ultra-light weight.

PROTECTION Elbows & Shoulders: EN 1621-1:2012 LEVEL 1

BIONIC ACTION V3 PROTECTION JACKET

MOTOCROSS / OFF-ROA

CODE 6500127
SIZE S - 2XL

ABOUT The Bionic Action V3 Protection Jacket is a full upper body protection system designed to be worn under the jersey and features all-new, removable A-Morph Technology shoulder, elbow, back and divided chest protectors for superior protective coverage and impact energy dissipation, without restricting mobility and comfort. Ultra-lightweight, this body armor delivers superior airflow and ventilation, while the breathable stretch mesh chassis allows the system to adapt naturally to body movement, ensuring stability, ventilation, and consistent protective performance across varied riding conditions.

KEY FEATURES All protectors in this garment feature A-Morph Technology, a morphing structural system that dynamically adapts to the rider's body, providing superior impact absorption, multi-impact resilience, lightweight flexibility, and enhanced comfort with integrated breathability and thermal regulation. The A-Morph system incorporates a removable liner concept, enabling separation of the protector from its textile housing. This allows users to machine-wash the fabric components without exposing the protective structure to mechanical or thermal stress. Tool-free snap-in/snap-out attachment simplifies disassembly and reassembly, encouraging regular cleaning and extending the functional lifespan of both the garment and the protector. The ease of maintenance directly supports improved hygiene and product durability. The main chassis is constructed from a soft tactile highly breathable stretch mesh fabric for optimized cooling performance. This body armor is engineered to be compliant with EU Sustainability Directives, and as such all components are available as spare parts. Features removable CE Level 1 Certified A-Morph Technology Shoulder, Elbow, Back and Chest Protectors.

BLACK WHITE 12

CONSTRUCTION Central zipper for ease of use. Adjustable elasticated waist belt for a precise secure fit. Adjustable elasticated forearm V-strap system to ensure the elbow protectors always remain securely in position. Adjustable side V-straps and shoulder straps to secure the chest and back protector in position while eliminating any unwanted movement. Extended tailbone section for greater coverage. YKK locking zipper to prevent any unwanted zipper movement while riding.

PROTECTION Elbows & Shoulders: EN 1621-1:2012 LEVEL 1

SEQUENCE YOUTH NECK ROLL

MOTOCROSS / OFF-ROAD

CODE 6741018
SIZE S/M - L/XL

ABOUT Designed and developed specifically for younger riders and drivers, the Sequence Youth Neck Roll is intended to limit muscular injuries caused by energies being transmitted through the neck as a result of excessive forwards, backwards or sideways movement of the head while motorcycling, mountain biking or karting.

KEY FEATURES Extended tail for secure positioning and stability. Double density core is constructed from a soft PU foam base embedded in a hard EVA layer for effective energy dissipation. Bottom and internal soft section (neck side) provides comfort for the shoulders and neck, while a hard section on the upper part gives stability and provides force distribution when the helmet impacts.

CONSTRUCTION Ergonomically designed and engineered to fit younger riders from 6-14 yrs. Easy-to-use soft strap closure on the front part. Highly compatible with all other Alpinestars youth protectors and jackets. External cover can be removed for washing by hook and loop grip opening on the rear.

MOTOCROSS / OFF-ROAD

CODE 2010520
SIZE US 7 - 13

ABOUT

According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017.

Construction uses a highly breathable, perforated microfiber.

TPU features is combined with ventilation zones and a new air flow system sole for breathability and superior ventilation.

Evolutionary new shin plate design with ventilation windows strategically positioned to allow more ventilation without compromising the impact protection.

Air vents on the TPU lateral calf plus breathable mesh insert improve comfort and reduce fatigue on short and long rides.

KEY FEATURES

New performance double pivot motion control system features:

Medial and lateral double pivot system for improved levels of flexibility and precision control.

Engineered bi-density front flexion control is strategically positioned over the mesh area, combined with a dual front blade system and shock absorber insert to offer mechanical progressive force release to dampen and absorb impact energies.

Re-designed dual density TPU rear blade system is engineered to prevent hyper-extension while offering improved flex control and impact resistance.

CONSTRUCTION

Built into the Tech 10's unique and lightweight single-piDOT / ECE co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded polyfoam to absorb high impact energies during a crash.

DHCP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg.

DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.

Co-injected for strength and structure, the exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance.

The contoured calf protector ergonomically wraps around the rear leg and is constructed from a dual density compound rear blade system to offer progressive dampening of excessive torsional forces.

Shin plate features a new anatomic design for reduced surface area and weight-saving.

Completely re-designed sole with proprietary grip sculpturing to improve foot-peg performance, grip and mud and water run-off.

Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support.

The sole offers superior durability, grip and feel while riding, and improved performance on the shifter.

The central sole insert features a micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.

Anatomically optimized for weight-saving and ergonomics, the new mechanical buckle closure system features a nylon and fiberglass compound for improved durability and strength.

The new slim-line buckle closure system includes high-impact bridge closures which are cold forged for precision and strength.

The buckle closure system features a memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.

Innovative, lightweight upper combines advanced lightweight microfiber with an impact and abrasion resistant TPU shell.

The foot shell features five different compounds in a single lightweight piDOT / ECE to offer strength while maintaining flexibility and structural integrity.

WHITE BLACK BRIGHT RED 2030

TECH 10

MOTOCROSS / OFF-ROAD

CODE 2010020
SIZE US 9 - 13

ABOUT

The Tech 10 has set the standard for Motocross boot performance and protection in the industry for well over a decade now, with an ongoing focus on product development and innovation that continues to raise the performance envelope higher and higher. At Alpinestars we believe in perfection through innovation while maintaining the iconic Tech 10 look, the latest model of the boot offers riders the ultimate in feel, comfort, and overall safety, raising the bar of what a premium motocross boot should be higher than ever before.

KEY FEATURES

Unparalleled Flex Control

A breakthrough innovation for the Tech 10 is the introduction of Alpinestars patented Frontal Flex Frame. Combining with the dual front and rear blade connectors, the Frontal Flex Frame gives the Tech 10 a complete and seamless flexion control system, from the foot shell all the way up to the shin plate, offering high performance double motion control, preventing over-compression and hyper-extension, featuring:

Engineered frontal flexion control offered by a dual-density TPU connector system, uniting the lower buckle plate with the upper blade connector, buckle and shin protector. Engineered to "float" freely between the lower and upper boot construction, the Frontal Flex Frame acts as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex, progressively releasing force which dampens and absorbs impact energies.

Asymmetrical, dual pivot arms on boot frame.

Ankle Control System

A unique feature of the Tech 10 is the ankle control system developed in the outer shell construction, allowing natural ankle movement, vertical compression control and improved impact protection.

CONSTRUCTION

Innovative, lightweight upper construction, the Tech 10 chassis combines advanced lightweight microfiber and impact and abrasion-resistant TPU shell. Foot shell features five different compounds in a single lightweight piece to offer strength while maintaining flexibility and structural integrity. Foot shell incorporates heel and toe protection that is highly resistant to abrasion and impact and adds to the boot's overall durability. Foot shell also includes integrated shank for support and structural integrity.

Frontal protection features a dual closure system with an internal microfiber flap, plus hook and loop fasteners for a precise fit closure beneath the buckle giving greater, micro-adjustable, precision which is convenient to operate. Soft microfiber gaiter helps seal out excessive water and dirt entry. Poly-fabric lining with 3D open cell foam incorporates anti-slip suede in heel area, keeping the foot located inside the boot.

TECH 7

MOTOCROSS / OFF-ROAD

CODE 2012025
SIZE US 6 - 13

ABOUT Packed with innovative materials, technology and design features, the Tech 7 has been completely overhauled to ensure exceptional off-road performance in the dirt. Engineered to be lighter, more comfortable and more protective than ever, the Tech 7 Boots deliver exceptional feel on the bike.

KEY FEATURES The TPU lower shell features an innovative design on the shifter area for reduced front roll and easy shift lever control, with a dedicated design for the left and right foot. This area is further strengthened with a metal shank and is reinforced on the toe zone for impact and abrasion resistance.

Equipped with a medial and lateral double pivot system for improved levels of flexibility and precision control.

Dedicated design on the medial side wall for improving the feel, support, and grip on the bike, while increasing the protection and durability of the boot.

New contoured TPU calf protector plate offers effective impact resistance.

The main flexion of the boot is supported around the medial and lateral ankle by a low profile pivot system for superior freedom of movement and rider comfort.

The front flexion zone features new innovative shock absorbing inserts in the front bellow zone for progressive support.

Shock absorbing padding is also strategically positioned on the ankles and shin plate for increased impact absorption.

New strap holder design offers maximum rotation and functionality, while reducing excessive rotation.

The sole is made with an innovative wear limit indicator embedded in the foot peg area. This layer displays a red layer alerting the rider when the sole is worn out and needs replacing.

The boot structure beneath the wear limit indicator is surrounded by a Kevlar® layer that maintains the structure and integrity of the boot while also protecting the boot.

CONSTRUCTION The closure system includes polymer buckles plus an aluminum frame with self-aligning, quick release closures for a customized secure fitment.

The buckle receiver is engineered to be self-aligning, guaranteeing a secure fit while preventing strap rotation.

The soft microfiber gaiter features a dedicated design especially for the back of the boot that effectively seals out excessive water and dirt entry.

The extended medial panel is constructed from TPU and its new design incorporates an enlarged rubber insert for maximum grip contact with the bike and improved heat and abrasion resistance.

The pull flap is engineered to offer increased prehensibility.

Updated and compact TPU shin plate construction for greater range of fitment, equipped with a reinforced hook and loop closure for a comfortable, highly customized fit.

PROTECTION The upper features extensive TPU protection on the toes, foot, heel, ankle, calf, and shin with extra hard compounds on the toe-box and heel for additional impact and abrasion resistance.

Upper suede leather with a lightweight microfiber construction for superior impact and abrasion resistance.

Additional TPU rear bridge for protecting the Achilles tendons.

Equipped with a poly-fabric lining with 3D open cell foam and anti-sliding suede reinforcement on the heel area for enhanced abrasion resistance.

The Tech 7 Boots are CE certified to EN 13634:2017.

PURPLE WHITE DK BLUE RED FLUO 3192

TECH 10 ENDURO

MOTOCROSS / OFF-ROAD

CODE 2010025
SIZE US 9 - 13

ABOUT Alpinestars' Tech 10 is the benchmark motocross boot and now the performance and protection envelope has been raised even higher with the creation of the Tech 10 Enduro version, a boot with a completely redesigned sole specifically engineered to offer the ultimate grip while offering Enduro riders with the highest levels of protection.

KEY FEATURES The CE-certified Tech 10 Enduro boot features its own dedicated 'Enduro' spec dual compound sole that is seamlessly integrated to the multi-density foot base structure with built-in support to offer superior durability, grip and feel while riding, and enhanced performance on the shifter.

The Tech 10 Enduro's design improves overall functionality, performance and safety, while decreasing weight and reducing material volume.

A key innovative feature of the Tech 10 Enduro is the patented Frontal Flexion Control Frame. Combining with the dual front and the rear blade connectors, the frame acts as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex. This gives the Tech 10 Enduro boot a complete and seamless flexion control system, from the footshell all the way up to the shin plate, offering high performance double motion control, preventing over-compression and hyper-extension.

The Tech 10 Enduro is equipped with Alpinestars ankle control system, which is integrated in the outer shell to allow natural ankle movement, vertical compression control and improved flex control and impact resistance. This is complemented by inner ankle brace and the unique heel protection innovation; the patented Dynamic Heel Compression Protector (DCHP). This significantly reduces the effect of excessive, potentially injury-causing, energy being transferred to the ankle and lower leg.

The Tech 10 Enduro has a Frontal Flex Frame, a complete and seamless flexion control system, from the foot shell all the way up to the shin plate, offering high-performance double motion control to prevent over-compression and hyper-extension. Incorporated into the frontal outer chassis of the boot and working in conjunction with Alpinestars unique, patented, dual torsion bar inner ankle brace, the Frontal Flex Frame is engineered to 'float' freely between the upper and lower boot, acting as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex, progressively releasing force which dampens and absorbs impact energies.

Other rider friendly touches include a slimmer and more streamlined profile with a contoured calf protector ergonomically wrapping around the leg, a dual compound removable anatomic footbed with EVA for comfort, support and even weight distribution, an ultra-thin and flexible forefoot area for increased sensitivity and control, and a new easier to operate, more secure mechanism on the triple buckle closure system.

CONSTRUCTION Co-injected for strength and to maintain the boot's structure, the Tech 10 Enduro's exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance.

The shin plate area is equipped with strategically positioned ventilation windows for superior airflow and ventilation without compromising impact protection.

The soft microfiber gaiter features a dedicated design especially for the back of the boot that effectively seals out excessive water and dirt entry, plus hook and loop fasteners, for a precise fit closure.

The closure system includes lightweight polymer buckles plus an aluminum frame with self-aligning, quick release closures for a customized secure fitment.

The pull flap is engineered to offer increased prehensibility.

PROTECTION The TPU lower shell features an innovative design on the shifter area, with a dedicated design for the left and right foot. This area is further strengthened with a metal shank and is reinforced on the toe zone for impact and abrasion resistance.

The lightweight microfiber upper features extensive TPU protection on the toes, foot, heel, ankle, calf, and shin with extra hard compounds on the toe-box, heel for additional impact and abrasion resistance.

Equipped with a poly-fabric lining with 3D open cell foam and anti-sliding suede reinforcement on the heel area for enhanced abrasion resistance.

The Tech 10 Enduro Boots are CE certified to EN 13634:2017.

TECH 7 ENDURO

MOTOCROSS / OFF-ROAD

CODE 2010426

SIZE US 8 - 14

ABOUT Featuring a specialized Enduro sole construction, the Tech 7 Enduro Boot is equipped with advanced protection and innovative performance features to create footwear built to perform in the toughest of terrains.

KEY FEATURES The 'Enduro' spec dual compound sole is seamlessly integrated into the multi-density foot base structure with built-in support to offer superior durability, grip, and feel while riding, and enhanced performance on the shifter.

Expanded calf adjustment range for an optimized fit.

Softened front foot flex zone for enhanced mobility, on and off the bike.

CONSTRUCTION Features a PU-reinforced microfiber upper for flexibility, abrasion resistance, water-resistance, and weight savings, and this material ensures a consistent fit while being easy to maintain and clean.

The buckle closure system incorporates polymer buckles combined with a high-impact aluminum frame for durability and weight savings.

The buckle system features a quick release locking system with self-aligning design for easy, precise closure, and improved riding performance and security.

Medial and lateral dual pivot system, optimally positioned for enhanced flexibility and precise control.

Extended microfiber gaiter helps seal out excessive water and dirt entry.

CONSTRUCTION Extensive TPU protection on the toes, foot, heel, ankle, calf, and shin, with extra durable compounds on the toe box and heel to further bolster impact resistance.

Contoured shin and ankle protectors for excellent levels of impact and abrasion resistance.

Soft reinforcements on the ankles for long lasting comfort and shock absorption.

The front flexion is supported and enhanced with a progressive design, featuring shock-absorbing inserts in the front bellow for optimum performance.

The medial-facing side incorporates a TPU panel with specially designed sculpturing for maximum grip contact with the bike and improved heat and abrasion resistance.

The Tech 7 Enduro Boot is CE certified to EN 13634:2017.

Extended PU synthetic gaiter helps seal out excessive water and dirt entry.

KEY FEATURES Contoured TPU calf protector plate, TPU higher medial protector, TPU outer lateral ankle and TPU heel counter offer support and resistance to impacts.

Rear TPR gaiter patch applied on top of the TPU calf protector gives protection and comfort on rear flex.

Injected TPU shin plate connected with the TPU medial protector panel; Hook and Loop upper closure, plus TPR flap for broad ranging calf fit adjustment and support.

The TPU higher medial protector is designed with technical texture for improved grip.

Bio-mechanical medial blade system allows a good front rear flex giving support and protection to the ankle.

The ergonomic TPU triple buckle straps wrap the front flex from the medial protector to the lateral side without compromising the flex.

Closure system includes 3 polymer buckles with an innovative closure system. This closure includes a ratchet with memory and a quick release/locking system with self-aligning design for easy, precise closure; the all buckles are replaceable.

Innovative one-piece TPU injected dual compound foot shell, reinforced by a metal shank inside a co-injected toe reinforcement.

CONSTRUCTION Soft foams surrounds the ankles and collar offer comfort and shock absorbing performance.

Entire textile lining for more comfort.

Replaceable EVA footbed with textile lining on top.

Specific Alpinestars all terrain design sole and high grip rubber compounds. The sole is replaceable.

PROTECTION According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

SIZE US 2 - 8 / EUR 35 - 52

ABOUT Featuring a unique, high strength sole construction offering durability and protective performance, the Youth Tech 7s Boot has been specifically developed for youth or smaller sized riders. The new outer sole evolution, derived from Alpinestars Tech 10 Boots and over 60 years of experience in motocross protection, delivers a racing spec boot for fast young riders. With class-leading protection, innovative performance features such as pivot system to movement and flexibility the Youth Tech 7s is built to withstand the toughest of terrains.

KEY FEATURES The Youth Tech 7s is specifically designed and sized for junior and/or smaller sized riders.

The Tech 7s boot features a PU-reinforced microfiber upper for flexibility, abrasion resistance, water-resistance and weight-saving, and this material ensures a consistent fit while being easy to maintain and clean.

Extended microfiber gaiter helps seal out excessive water and dirt entry.

Soft poly foam reinforcement on ankles and collar for long lasting comfort and shock absorption.

New compound sole for MX25 provides riders with a high performing grip throughout offering optimal movement back and forth on the footrest.

CONSTRUCTION Excellent flexion provided by low profile medial and lateral pivot system to offer movement and support.

Instep and Achilles accordion flex zones constructed for superior control and support.

New compound sole is seamlessly integrated into the base structure for superior durability, high performing rubber grip patterning, and feel. The sole provides an ergonomic heel shape, and in addition to the external foot grip, has a toe tip grip, extended gear grip as well as brake grip for performance, and offers ease of movement back and forth on the footrest. The sole is replaceable.

Removable anatomic footbed for comfort and support ensures even weight distribution.

Textile mesh with open cell foam for improved air circulation and comfort.

Buckle closure system incorporates polymer and fiberglass buckle arms and high-impact aluminum bridge closures for durability and weight saving.

Buckle system features memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.

PROTECTION Contoured shin plate is injected with high modulus TPU for excellent levels of impact and abrasion resistance.

Medial facing side incorporates TPU panel with specially designed sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.

One-piece injected dual compound foot shell with co-injected hard toe protector and integrated steel shank. The shell is highly resistant to abrasion and impact, adds to the boot's overall durability and improves boot's streamlining.

The Tech 7s Boots are CE certified to EN 13634:2017.
