BICYCLE, SCOOTER  
& POWER TRANSPORT  
SECURITY

## 2025

# ONGUARD®

## ONE MEAN LOCK™

OnGuard makes the meanest, toughest locks in the business.

Packed with features inside and out, we deliver the best combination of security, quality and value.

On the inside, OnGuard locks earn the highest safety ratings with double and quad-locking mechanisms, bump-resistant cylinders, and hardened steel shackles and chains.

On the outside, our locks are fully-coated to protect your vehicle or “toy” from scratches, while the bright colour scheme sends a clear warning to thieves: don’t even try!

And then there’s the extras: all-tube mounting brackets, five laser cut keys, key-code registration, and limited lifetime warranties.

## OUR SECURITY RATING SYSTEM

### Comparing locks has never been easier.

Determine the security level needed:

**RED** - Ultimate security for inner city and high crime areas.

**BLUE** - High security for medium crime areas.

**GREEN** - Base security for low to moderate crime areas.

**Use the numbers within the color level to compare locks.**

The higher the number, the more security provided.

This makes selecting the right lock simple and intuitive with up-selling opportunity.

## PROTECTION, FEATURES, VALUE - ONGUARD GIVES YOU MORE

Of course OnGuard locks offer the best security in the business, but beyond that OnGuard locks are made from high quality materials, packed with user friendly, and value added features. From the pick, pull, drill and bump-proof protection of the new Z-Cylinder, outstanding X4P and X2P Locking Bolt Mechanisms, to our new double rubber coatings, to the new Twist Lock mounting bracket - nobody gives you more than OnGuard.

Therefore, OnGuard offers the best combination of security, quality, features, and price.

## ONGUARD INNOVATION MEANS MAXIMUM SECURITY

A lock is only as good as it's weakest link. And where some locks secure only one side of the shackle, OnGuard's patented X4P Quattro Bolt, X2P Double Bolt and X2P Dual Lock Down mechanisms secure both sides for a double-redundant system that resists attack from pulling, jacking and prying. And OnGuard's user-settable SBC Steel Ball Combo locks feature a high security click gear system that resists picking and pulling.

Simply put, OnGuard lock technology means maximum security.

## CYLINDER TECHNOLOGY

### Z-Cylinder

The Z-Cylinder offers high pick protection and feature BumpBlock™ technology rendering bump keys useless. Lock mechanism is encased in ultra-hardened steel to resist drilling or pulling.

- The unique construction makes the Z-Cylinder virtually pickproof
- BumpBlock renders bump keys useless
- Ultra-steel encased mechanism defeats drilling

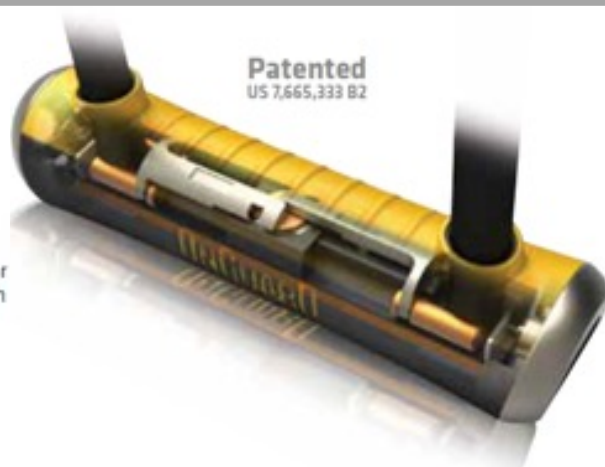

# LOCKING BOLT TECHNOLOGY

## X4P Quattro Bolt

X4P Quattro Bolt mechanism secures the shackle to the crossbar in four places maximizing strength to resist pulling, jacking, prying and twisting.

Patented  
US 7,665,333 B2

Pat. Pend.

## X2P Dual Lock Down

Padlocks with X2P Dual Lock Down mechanisms secure both sides of the shackle for ultimate pull resistance.

## X2P Double Bolt

X2P Double Bolt mechanism secures both sides of the shackle to the crossbar for high resistance to pulling, jacking and prying.

Pat. Pend.

Patented  
US 7,665,333 B2

## X2P Double Bolt

Cable locks with X2P Dual Lock Down mechanisms secure cable to lock head in two places for high pull and pry resistance.

## DOBERMAN SERIES OG CABLE LOCK

Doberman series coiled cable locks are lightweight, easy to carry, and offer fast, convenient security.

The lock features our special X2P mechanism and Z-Cylinder, and the heavy duty steel cable is permanently forged to the lock head for excellent security.

- AX2P Double Bolt lock heads for ultimate pull resistance.
- Z-Cylinder tumbler mechanism protects against picking and bump attacks.
- Heavy-duty braided steel cable.
- Lock heads are permanently forged to cable ends.
- Self coiling for convenience.
- Vinyl coating protects paint and finishes.
- Double rubber-coated lock head covers protect paint and finishes
- Attached velcro straps contain unruly coils during transport
- Includes a Twist Lock mounting bracket
- Supplied with 5 laser-cut keys (1 with a micro LED).

## BEAST SERIES OG CHAIN & LOCK

We've combined our premium Beast Padlock with our huge 12mm hexagonal chain to offer the highest level of security for locking up your moto, bicycle or powersport vehicle in high crime areas.

The Beast padlock features a closed in 11mm shackle with our special X2P mechanism and Z-Cylinder for the highest security, and our special titanium reinforced and hardened 12mm chain resists cutting or prying.

- Super-short 11mm hardened steel shackle
- Shackle design provides no leverage points for prying or jacking.
- X2P Dual Lock bolt mechanism secures the shackle on both sides.
- Z-cylinder tumbler mechanism that is bump-proof and resists picking, pulling, or drilling.
- Double rubber coated lock body protects paint and finishes.
- Automatic keyway covers helps seal lock internals against the elements.
- Supplied with 5 laser-cut keys (1 with a micro LED).
- Chain made of 12mm thick, titanium-reinforced, hardened steel hexagonal links that resist cutting or prying.
- Hexagonal links with tight inside dimensions render prying and bolt cutters useless.
- Chain cover protects paint and finishes, with an embroidered logo that won't flake or wear off.

X2P Double Bolt

## MASTIFF SERIES OG CHAIN & LOCK

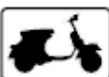

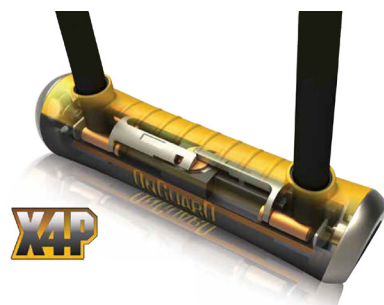

Mastiff series chains & locks are packed with features, and provide superior security for medium/high crime areas.

The premium Mastiff lock has our special X4P locking mechanism and Z-Cylinder for high security, and a big 5.5 cm X 5.5cm shackle that can even be used as a disc lock. Our chain has 10mm hexagonal links for high security, and the special “sinch loop” design offers even more versatility.

- X4P Quattro Bolt Locking mechanisms secure the shackle at 4 points.
- Z-cylinder tumbler mechanism that is bump-proof and resists picking, pulling, or drilling.
- Short D-Shackle design eliminates pry points for superior protection.
- Heavy duty 14mm hardened steel shackle resists prying, cutting or jacking.
- Co-molded crossbar cover protects finishes.
- All-metal endcaps provide protection against hits and drops.
- Automatic keyway cover helps seal lock internals against the elements.
- Supplied with 5 laser-cut keys (1 with a micro LED).
- Chain made of 10mm thick, titanium-reinforced, hardened steel links that resist cutting or prying.
- Hexagonal links with tight inside dimensions render prying and bolt cutters useless.
- Clever cinch-loop design adds locking versatility.
- Chain cover protects paint and finishes, with an embroidered logo that won't flake or wear off.

**ZCYL**  
Z-Cylinder

## PITBULL SERIES OG U-LOCK & CABLE

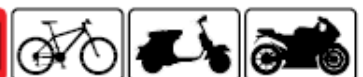

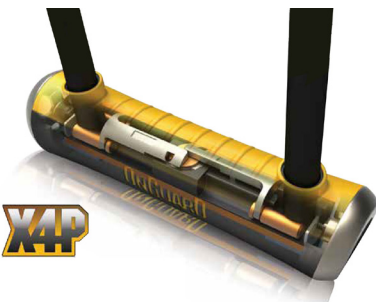

The combination of our premium Pitbull series U-Lock with our high quality Akita cable offers an extremely secure and versatile lock package. The Pitbull lock features our outstanding X4P locking mechanism and Z-Cylinder, with a hefty 14mm hardened shackle.

It offers the versatility of being able to be mounted through wheels or frames, or combined with the Akita cable to loop through other parts of your machine, or tether it to an anchor point.

- X4P Quattro Bolt Locking Mechanism locks shackle at four points.
- Z-Cylinder tumbler mechanism is bump-proof and resists picking, pulling, and drilling.
- Tri-Radius shackle creates more internal space for locking versatility.
- Hefty 14mm thick hardened steel shackle resists cutting, prying, and jacking.
- Rounded design and centered keyway eliminates pry points.
- Co-molded crossbar cover and double rubber coated shackle protects paint and finishes.
- All-metal endcaps provide additional protection against hits and drops.
- Automatic keyway cover helps seal lock internal against the elements.
- Snap lock mounting bracket included.
- Supplied with 5 laser-cut keys (1 with a micro LED).
- Heavy duty 10mm twisted steel cable.
- Vinyl coating protects paint and finishes.
- Permanently swedged loop ends.

**ZCYL**  
Z-Cylinder

## BULLDOG SERIES U-LOCK & CABLE

Our high quality Bulldog series U-Lock gives you high security with a heavy duty 13mm shackle and our X2P locking mechanism, and when combined with our Akita cable you get a highly secure, versatile lock package with excellent value.

- X2P Double Bolt Locking Mechanism locks shackle on both sides.
- Z-Cylinder tumbler mechanism is bump-proof and resists picking, pulling, and drilling.
- Hefty 13mm thick hardened steel shackle resists cutting, prying, and jacking.
- Rounded design and centered keyway eliminates pry points.
- Double rubber coated crossbar cover protects paint and finishes.
- Keyway cover helps seal lock internal against the elements.
- Snap lock mounting bracket included.
- Supplied with 5 laser-cut keys (1 with a micro LED).
- Heavy duty 10mm twisted steel cable.
- Vinyl coating protects paint and finishes.
- Permanently swedged loop ends.

# U-LOCK SMART ALARM

## 120dB ALARM

Perfectly suited for power sport users and cyclists, our Smart Alarm U-Locks offer our highest level of security in one convenient, easy-to-use design.

Our large U-Bolt can be locked through wheels, discs or frames, or simply use it as a large lock to secure multiple items – with the added security of a 120dB Alarm!

- 120dB Alarm.
- Auto Arm/Disarm.
- Shock & Movement Sensors.
- High security locking mechanisms secure both sides of the shackle.
- 16mm Hardened steel shackles are impervious to prying, jacking, or cutting.
- 12.4cm X 20.8cm shackle provides ample room for locking on vehicles or objects.
- Round profile and smooth edges eliminate leverage points
- Fully coated shackles and crossbar protects delicate finishes and paint jobs
- Snap lock mounting bracket included.
- Supplied with 5 laser-cut keys.

### ADDITIONAL FEATURES

OG8266 | OG U-LOCK SMART ALARM | 16mm X 12.4cm X 20.8cm

\$125.00

## BOXER SERIES D-SHACKLE | DISC LOCK

Our premium Boxer D-Shackle Lock provides extremely high levels of security, and can also be used as a Disc Lock.

Large 55mm x 55mm opening fits many disc and rotor openings, and the heavy duty 14mm hardened steel shackle resists all attack from cutting, prying or jacking. X4P Quattro Bolt locking system secures the shackle on four sides for ultimate protection, and the included disc reminder helps prevent accidental drive offs.

- X4P Quattro Bolt Locking mechanisms secure the shackle at 4 points.
- Z-cylinder tumbler mechanism that is bump-proof and resists picking, pulling, or drilling.
- Heavy duty 14mm hardened steel shackle resists prying, cutting or jacking.
- 5.5cm X 5.5cm shackle provides plenty of room for cables, chains, or anchors.
- Short D-Shackle and rounded design eliminates pry points for superior protection.
- Co-molded crossbar cover protects finishes.
- All-metal endcaps protect against hits and drops.
- Automatic keyway cover helps seal lock internals against the elements.
- Supplied with a reminder cable.
- Supplied with a carry pouch.
- Supplied with 5 laser-cut keys (1 with a micro LED).

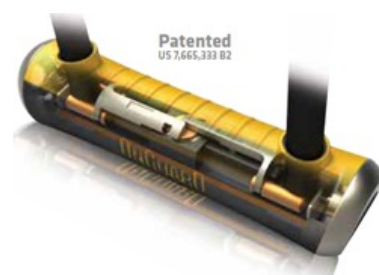

### X4P Quattro Bolt

X4P Quattro Bolt mechanism secures the shackle to the crossbar in four places maximizing strength to resist pulling, jacking, prying and twisting.

### Z-Cylinder
